Distilling Evaluation Practice into 43 ESSENTIAL TASKS

Kelly Robertson & Lori Wingate | Western Michigan University

Lift flaps to view
abbreviated tasks

TASK STATEMENT STRUCTURE

Each task statement (1) describes an evaluation-related **activity** that has a clear beginning and end and (2) includes a **rationale** that explains the larger purpose served by that activity.

CONTEXT & PURPOSE

The tasks are tailored to evaluation in the National Science Foundation's Advanced Technological Education (ATE) program. The task list serves as a road map for EvaluATE's evaluation capacity-strengthening work.

DEVELOPMENT & VALIDATION

We based the initial task list on the AEA Evaluator Competencies, Program Evaluation Standards, and our experience as evaluators. The tasks were validated through (1) a year-long evaluation task-tracking study involving evaluators and project leaders and (2) a Delphi study.
